

CUSEC 2006 Call for Papers

The Canadian University Software Engineering Conference is a meeting point of interested (or passionate) software engineering students. Our priority is the promotion and development of the software engineering field. We are thus distinguished by offering students, as well as teachers and professionals, a conference which combines purely scientific considerations with the industrial practical applications in the effervescent field of software engineering.

The conference is synonymous to new knowledge and personal enrichment. It is an occasion for passionate presenters to communicate their thoughts and works to an equally passionate audience. It also enables our corporate partners to make their companies known, to meet future graduates, and to be associated to a product of quality, innovation, and reliability.

This year, the conference theme is “Engineering Useful Software”, which carries us on the tracks of interesting presentations. The topics include, but are not limited to the following key areas:

- Requirements Engineering
- Verifications and formal methods
- Software processes
- Usability/Interaction Design
- Security
- Mobility and ubiquitous computing
- The business of software
- Test-driven development
- Software best practices
- Social software

For more information, visit <http://cusec2006.soen.info>

Submission and Review Process

CUSEC 2006 solicits high quality papers reporting research results and/or experience reports related to the topics mentioned above. Papers in English and French are accepted.

Important Dates

- Submission of Paper Abstract: December 5th, 2005
- Notification of Acceptance: December 20th, 2005
- Camera-Ready Paper Submission: January 6th, 2006

Additional Information

The complete paper submission will be in the size of 6 pages. The paper should have an abstract of no more than 250 words and must be formatted according to the proceedings template of ACM SIG found at <http://www.acm.org/sigs/pubs/proceed/template.html>.

For more information, please contact the presentations team:

Ashraf Gaffar (gaffar@cse.concordia.ca)

Ahmed Kamel (public@ahmedkamel.net)

Thank you for your collaboration

On behalf of the Presentations Team, CUSEC v5.0 (2006)
