

CUSEC 2006

CALL FOR PRESENTATIONS

“ENGINEERING USEFUL SOFTWARE”

The Canadian University Software Engineering Conference (CUSEC) is a student organized conference promoting the Software Engineering field. Following the astounding success of 4 consecutive years, CUSEC is ready to celebrate its 5th anniversary with a resounding comeback to its city of origin, **Montreal on January 19, 20, and 21, 2006.**

The chosen theme this year is “Engineering Useful Software”. The conference is synonymous to new knowledge and personal enrichment. It is an occasion for passionate presenters to communicate their thoughts and works to an equally passionate audience. It also enables our corporate partners to make their companies known, to meet future graduates, and to be associated to a product of quality, innovation, and reliability.

Possible Topics:

- Requirements Engineering
- Verifications and formal methods
- Software processes
- Usability/Interaction Design
- Security
- Mobility and ubiquitous computing
- The business of software
- Test-driven development
- Software best practices
- Social software

Corporate Presentation

Length: 45 minutes

Description: Expose the audience to your experience within a corporate environment. This may range from the usage of technology, team management to the software process and case studies.

Tutorial / Workshop

Length: 90 minutes

Description: A tutorial will allow attendees to correlate the theory with the practice. It will feature interactivity and utilize a more hands-on approach. Tutorials require the speaker to show attendees how things are done, while workshops will have attendees going through drills with the speaker.

Academic Presentation

Length: 45 minutes

Description: Academic presentations concentrate on the theoretical aspect of Software Engineering. Such presentations are mostly given by graduate students, professors, and research groups.
